We process Resonata Collected Data on behalf of our Resonata Customers, who may use the same to contact you directly. SMS/Text Messaging and Mobile Information

Resonata operates a text messaging program on behalf of participating hotel properties. When a Guest calls a participating hotel and requests a reservation link, the Resonata voice agent asks the Guest for permission to send that link by text message. Consent is collected verbally during the call and is never required in order to make a reservation; Guests who decline are offered the same link by e-mail.

Guests who consent receive a single transactional message containing the requested booking link. Message frequency is one message per Guest request. Message and data rates may apply. Guests may reply STOP at any time to opt out, START to opt back in, or HELP for assistance.

The mobile telephone number collected for this purpose is used solely to deliver the requested booking link and to honor opt-out and help requests. **No mobile information will be shared with third parties or affiliates for marketing or promotional purposes. All other categories exclude text messaging originator opt-in data and consent; this information will not be shared with any third parties.** Mobile numbers and consent records are shared only with the messaging service providers and telecommunications carriers strictly necessary to transmit the requested message.

Full program terms are published at <https://resonata.io/legal/sms-terms>.
